

Verified completion status (v2.1.0)

Ideal 12-bit dynamic baseline	PASS	73.666 dB / 11.944 bit
100-seed calibrated dynamic gate	PASS	73.112 dB / 11.852 bit
Calibration-to-oracle gap	PASS	P50 0.222 dB; P95 0.524 dB
Full static monotonicity	FAIL	2 missing codes at 2048 pairs
Paper-exact Shen architecture	NOT IMPLEMENTED	3 redundancies / reservoir / SRM absent

The behavioral model is complete and reproducible; full static sign-off and paper-exact Shen hardware remain explicitly outside the passing claim.
